Aspaen

Excellence as a lifestyle

“We understand that our students are unique people, leaders in their education and in their own lives. At Aspaen, we offer personalized and comprehensive education, with a transcendent view of life.”

ASPAEN School Network

UNITY, FAMILY, SCHOOL

Families

The work of parents in the development of students requires continual dedication. The work of schools consists of **promoting diverse educational environments and tools** that help enrich the work of parents as the first teachers of their children.

Teachers

Teachers should be an example to follow, but also a companion for each child as they strive towards the best version of themselves. It's important to facilitate team building environments and to promote **pedagogical and didactic innovation**, keeping in mind the uniqueness of each student.

Students

Students are the reflection of the education driven by their families and made real by their schools. It is essential to support children in their development, whether academic or personal, so that they can dream freely and **face the future with excitement.**

THE UNLIMITED LEARNING ECOSYSTEM OF ASPAEN SCHOOLS

Challenges in education nowadays often have to do with bringing together family participation, teacher effort, and student initiative. To help in this process, ASPAEN schools has created its own Unlimited Learning Ecosystem, a meeting place for all the people involved in the development of today's students.

- **More than 42,000 digital titles** from the best content providers in the world, covering different topics of interest for different age groups and grade levels: literature, STEM subjects, languages, science, classics, modern, and much more.
- Thanks to its technology, the platform recognizes each user's interests and **refines content to offer the most suitable titles** according to each student's interests and needs.
- Family and teacher access to **real time reports** on student progress and skills.
- Learning experiences and reading plans created by education experts with teacher ability to modify or create new plans and experiences.
- Multimedia content in **multiple formats**: ebooks, audiobooks, podcasts, magazines, and videos, among others, as well as the ability to work with **proprietary content designed by the school**.
- Simple and intuitive user experience, similar to other platforms which promote use and **interaction by students**.

ASPAEN, A FORWARD-LOOKING EDUCATIONAL PROJECT WITH VALUES

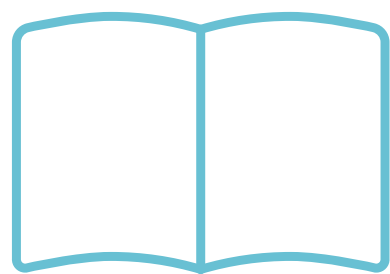

All students are capable of developing themselves in the four elements that define human identity: body, character, intelligence, and freedom. ASPAEN schools promote personalized education according to educational didactic strategies focused on the specific needs of each stage of development.

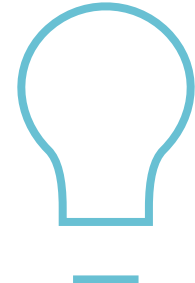

Personalized education

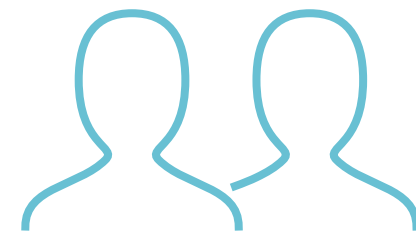

Access to the best educational resources

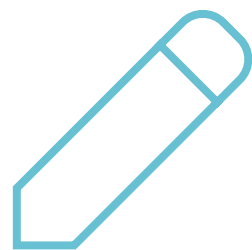

Dynamic reading plans

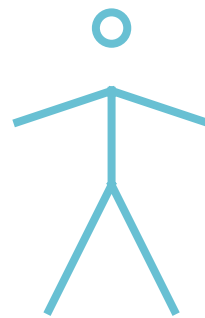

Interactive learning experiences

Active family involvement

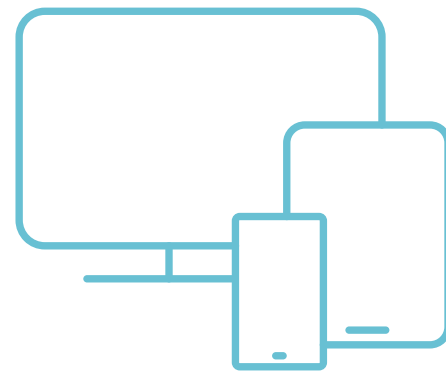

Learning itineraries for families and teachers

Adaptability for students with special needs

Access with or without an internet connection

Access on up to 6 different devices

About ODILO

ODILO is the leading SaaS EdTech company in the creation of Unlimited Learning Ecosystems. ODILO integrates the newest technology (Artificial Intelligence, Machine Learning...) with multiformat content from the best providers in the world and intelligent learning services to help every organization deepen and promote a personalized, unlimited learning culture.

With ODILO, schools, governments, organizations, companies, and many more can create their own Unlimited Learning Ecosystems and enjoy learning experiences, education, and reading to prepare students for the future.
