

Salesian Schools of Bizkaia

The Unlimited Learning revolution comes to the entire academic community of the three Salesian Schools

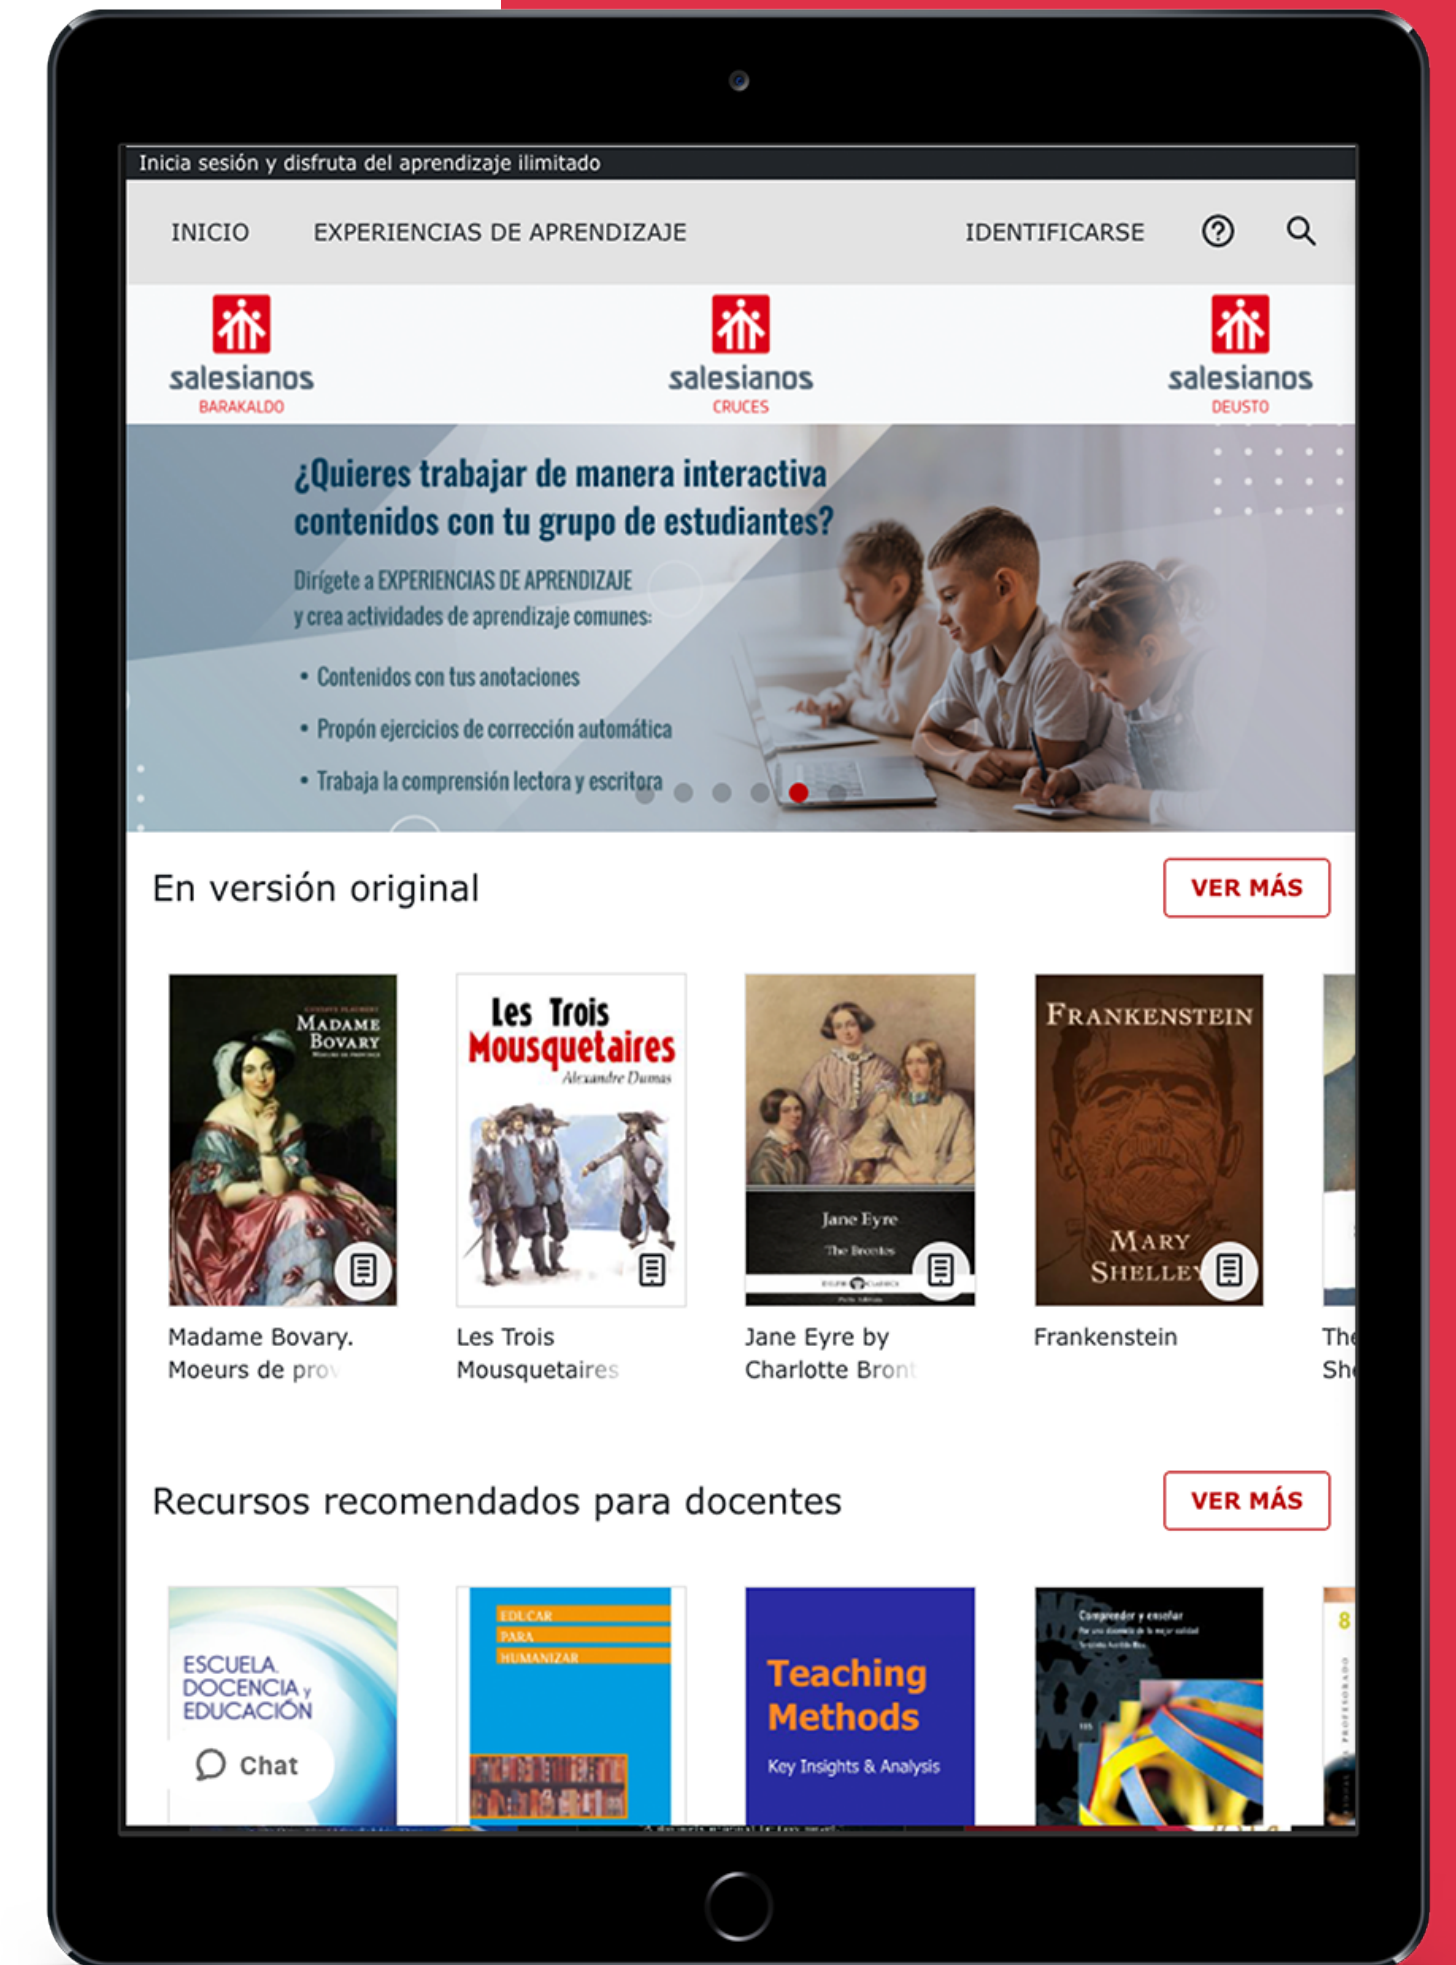

SALESIANS BIZKAIA AND ODILO, AN ALLIANCE FOR PERSONALIZED EDUCATION

The disconnect between new generations of students and the educational curriculum is growing more and more obvious. Salesianos of Bizkaia schools fight every day to adapt education and learning to new ways of thinking and learning.

With support from ODILO, **Salesians are creating their Unlimited Learning Ecosystem**, which will not only motivate students thanks to a large quantity of titles to consume and learn with, but will also allow them to involve their families in the educational project.

“We believe that this is the path to education: Involving families in the learning process, giving teachers the best tools to work with, and preparing students for the problems of the future.”

David Villahoz
Director of Salesians Barakaldo

SALESIANS, AN INSTITUTION WITH A LONG EDUCATIONAL TRADITION

The Salesian schools in Bizkaia have been offering a **wide range of educational proposals since 1897**, when Salesianos Barakaldo, the first of the three schools in the province, was founded.

Their interest in facilitating training and transition into the world of work has always kept them linked to the business that makes up the fabric of Bizkaia.

Now, they are focused on the continuous improvement of their educational services for the entire Basque Community.

COMPREHENSIVE TRAINING AND LEARNING HABITS

The main objective of Salesians schools is the comprehensive training of its students through:

Bilingualism

Respect for the environment

Innovation

Constant improvement

In order to:

- ✓ Generate study habits
- ✓ Encourage family spirit
- ✓ Involve parents in school
- ✓ Involve teachers in the operation of the school
- ✓ Cultivate habits of coexistence
- ✓ Encourage international experiences
- ✓ Provide access to education for marginalized groups
- ✓ Help students enter the labor market

UNITING THE SALESIAN COMMUNITY THROUGH THEIR UNLIMITED LEARNING ECOSYSTEM

The Salesian schools of Bizkaia are joining forces to create, with support from ODILO, their own Unlimited Learning Ecosystem to which the entire academic community will have access and with which they intend to achieve the comprehensive training of students in a unified way.

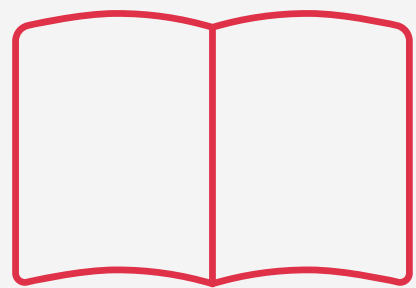

"This project is very exciting for everyone, especially because it brings together three Salesian schools to create a common project that will be beneficial for all students" - as described by Roberto Fernández, Head of Innovation at Salesians Cruces.

The Salesian Unlimited Learning Ecosystem will be a point of connection for the three Salesian Bizkaia schools, **contributing to the unity of the entire academic community.**

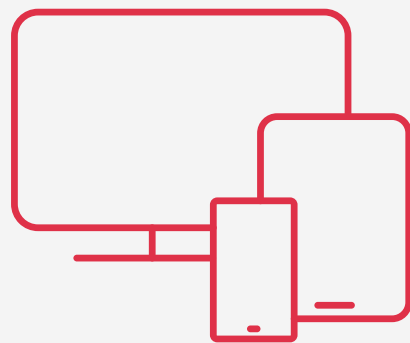

THE UNLIMITED LEARNING ECOSYSTEM OF SALESIANS BIZKAIA

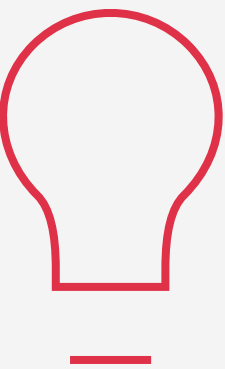

This is the Salesians Unlimited Learning Ecosystem created by ODILO:

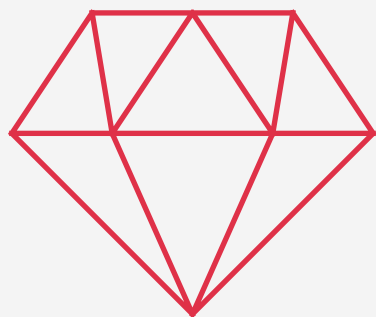

Millions of titles for different courses
and levels of study

Content in different formats to adapt to the
preferences of each student

Unique Learning Experiences to complement the
curriculum and promote independent learning

Curated content from the best providers
available for use by teachers, parents and
students

Artificial Intelligence that recommends
content based on each user's tastes and
preferences

Information on student progress for teachers

PERSONALIZING LEARNING AT SALESIAN SCHOOLS THROUGH UNLIMITED LEARNING

The Unlimited Learning Ecosystem of Salesians Bizkaia is much more than a content repository, among its many great benefits for students, the technology developed by ODILO allows:

Independent learning for Salesian students at all stages (from Primary to Secondary).

Student research, allowing them to find content they would like to propose for the classroom, thus encouraging their participation and commitment.

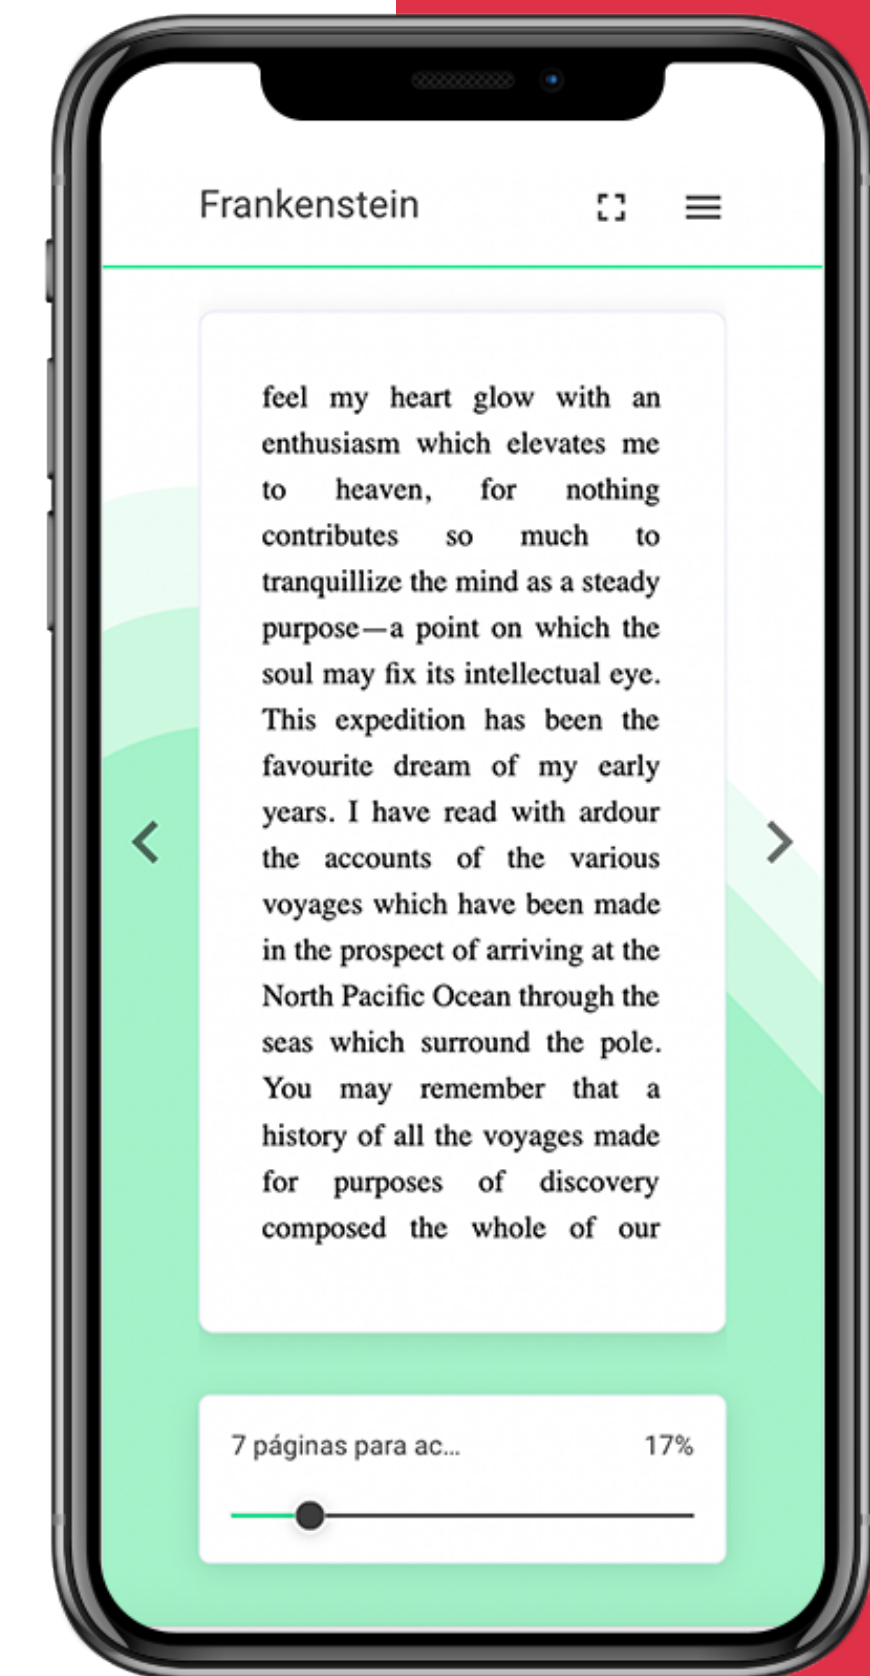

Collaborative projects and work through the platform, which facilitates connection even at a distance.

Reading clubs and plans that complement the curriculum and allow students to explore and learn more about the world of literature.

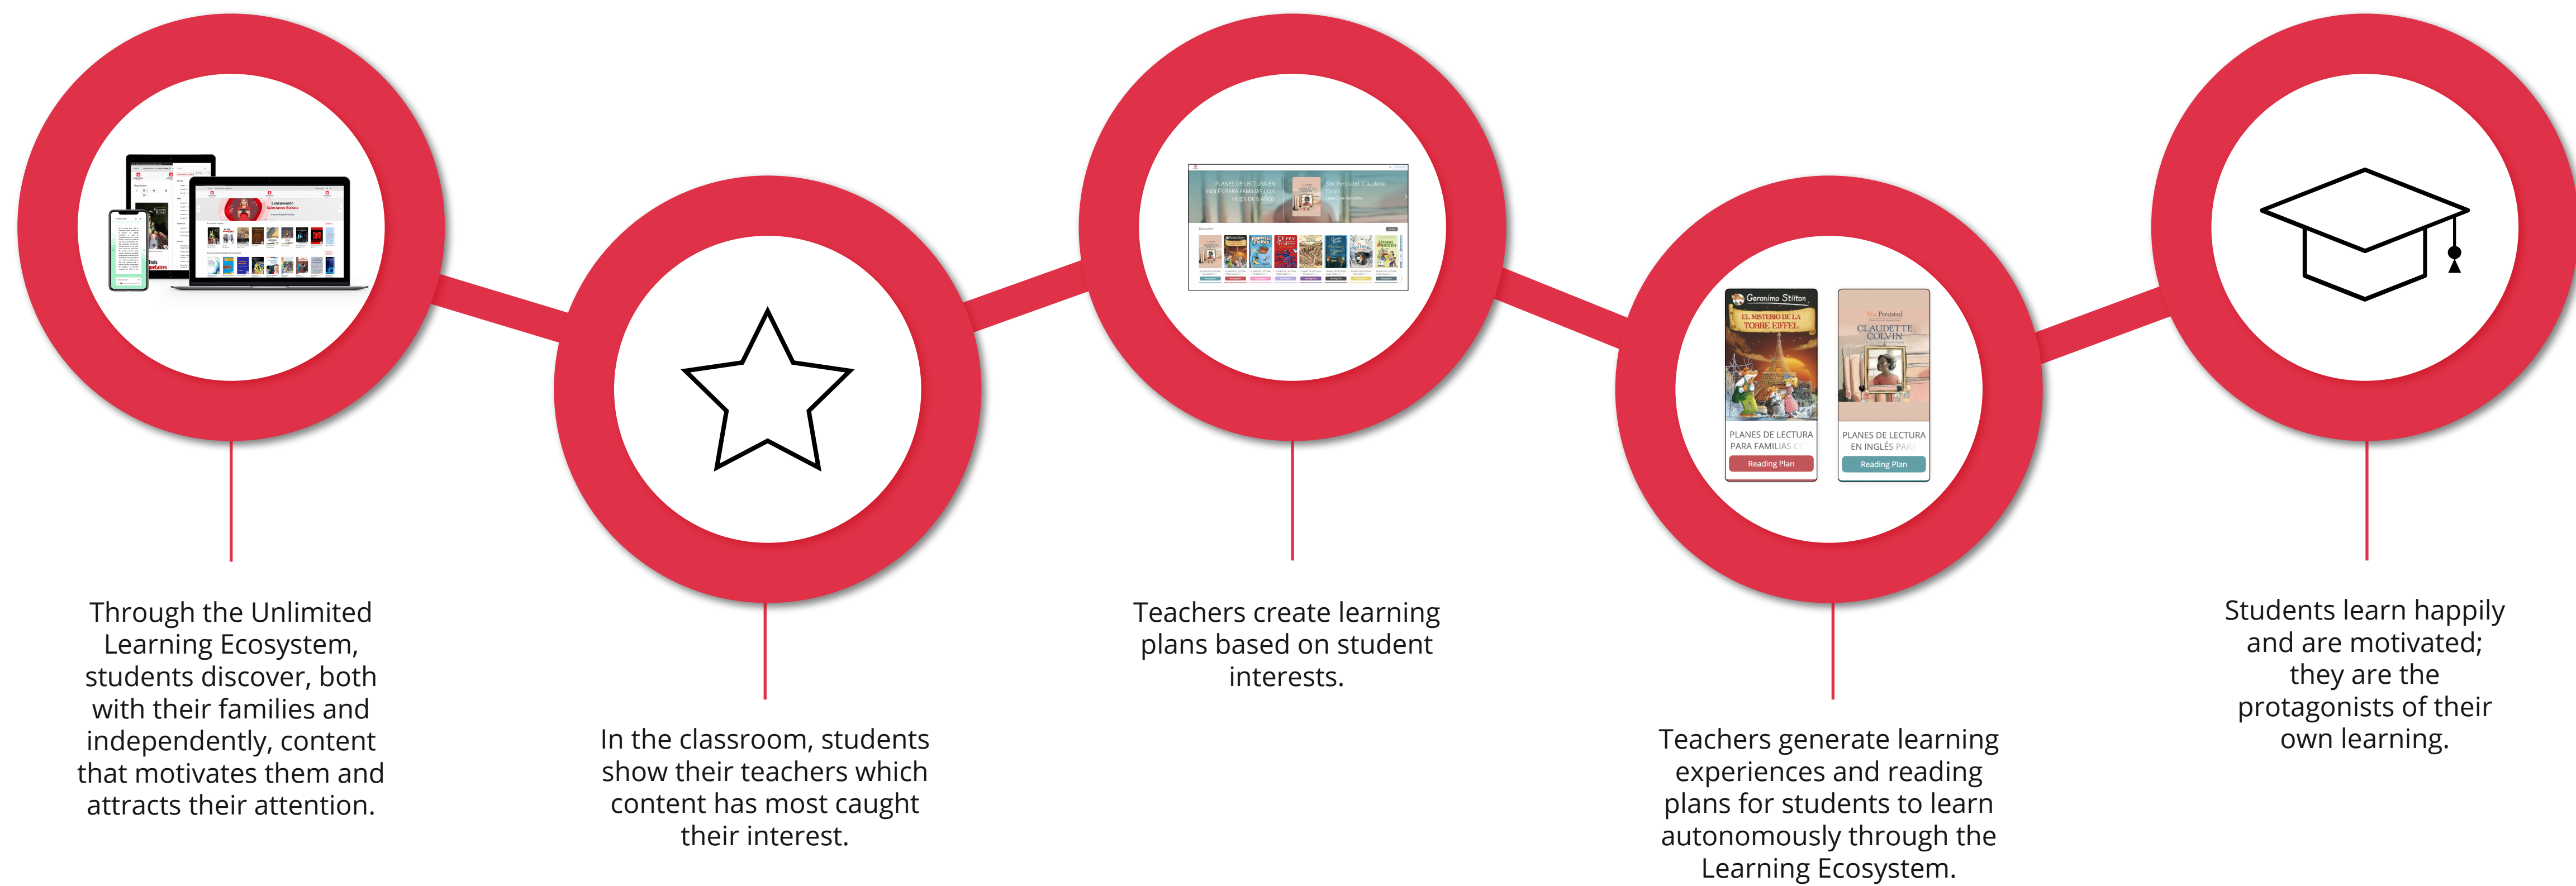

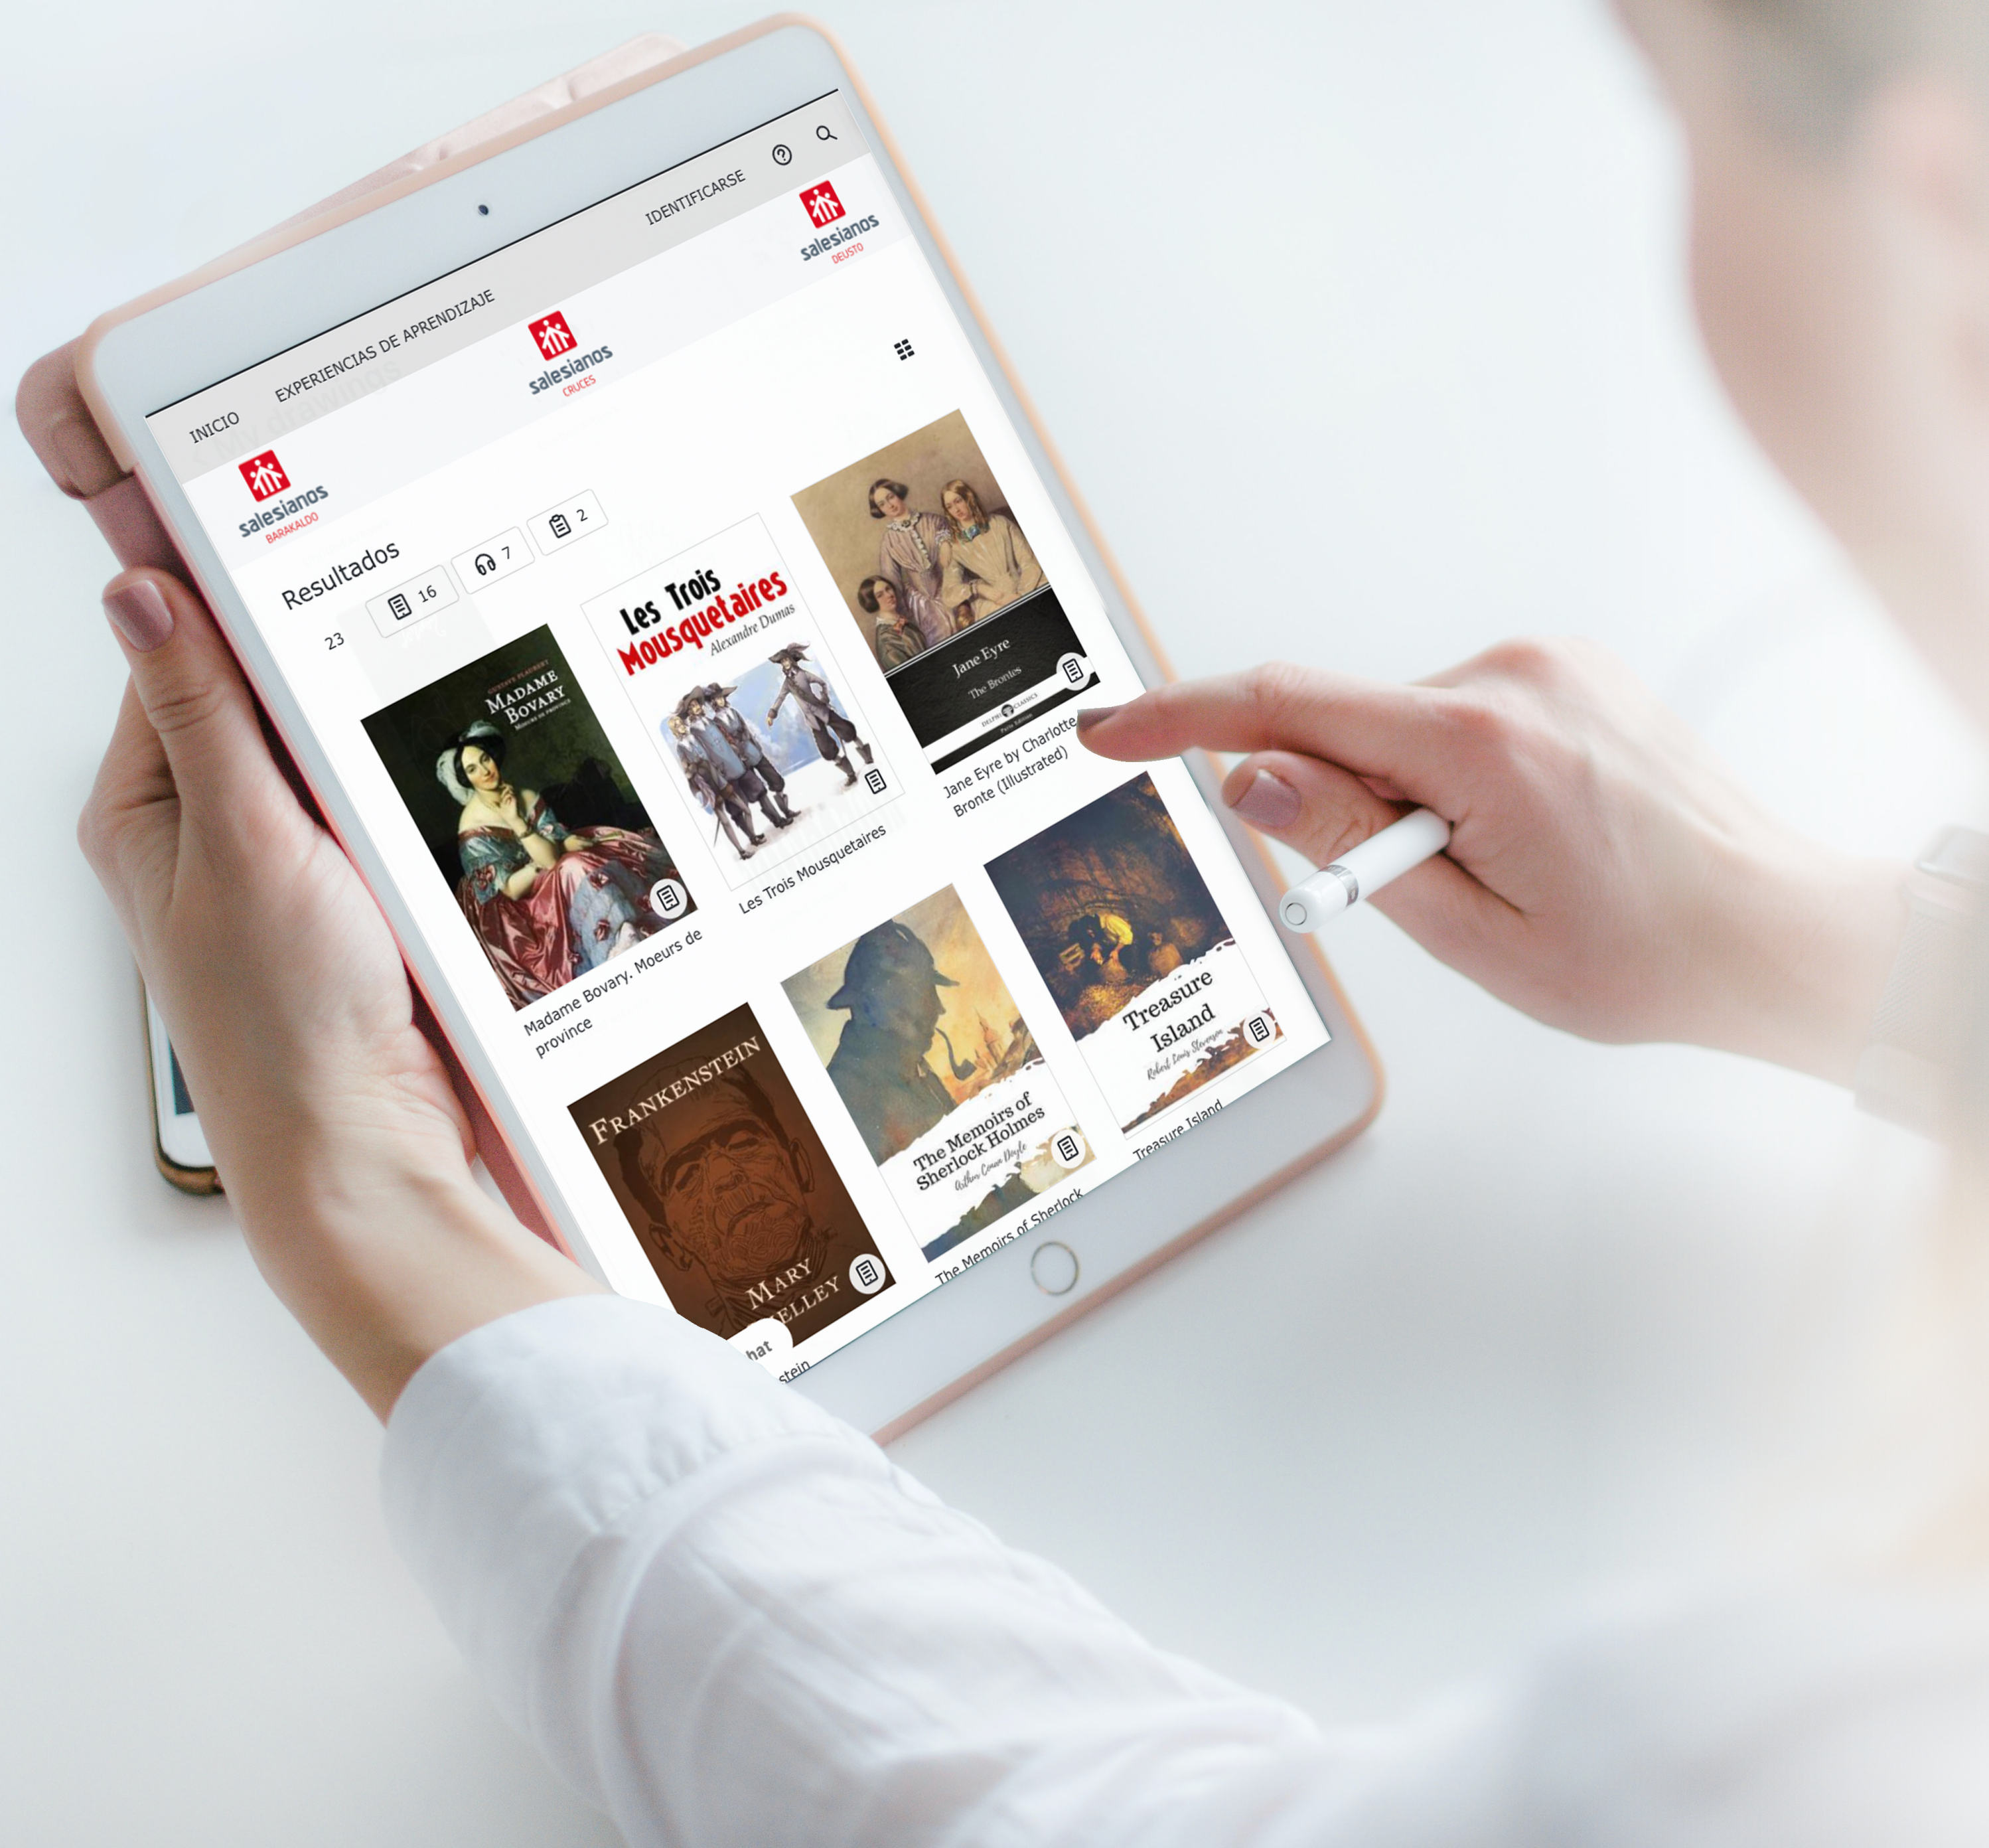

Attention to diversity through the personalization of plans complementary to class time, for example, for students with outstanding abilities.

THE STUDENT AT THE CENTER OF THE TEACHING MODEL WITH UNLIMITED LEARNING ECOSYSTEMS

Unlimited Learning also makes it easier for teachers to focus their teaching on students.

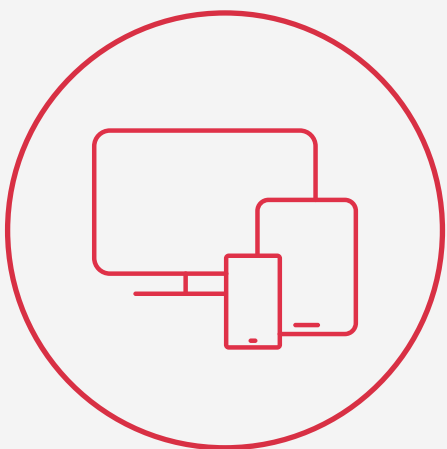

"I think it's something that's going to be an opportunity throughout the year and across all the years that we can have this access. The fact that students can discover things and discuss their discoveries with teachers, that they are the ones who find material and seek out new experiences, will also help teachers to plan according to their interests. We are going to take advantage of the ecosystem to make learning more meaningful."

*Arkaitz Valderrama,
Primary School teacher at Salesians Deusto*

A CONSTANTLY-EVOLVING LEARNING ECOSYSTEM

Salesian Schools of Bizkaia receive continuous support from ODILO’s education and pedagogy experts to drive use of the Ecosystem across their academic community and improve the platform with:

Enrichment of the platform with **curricular content**

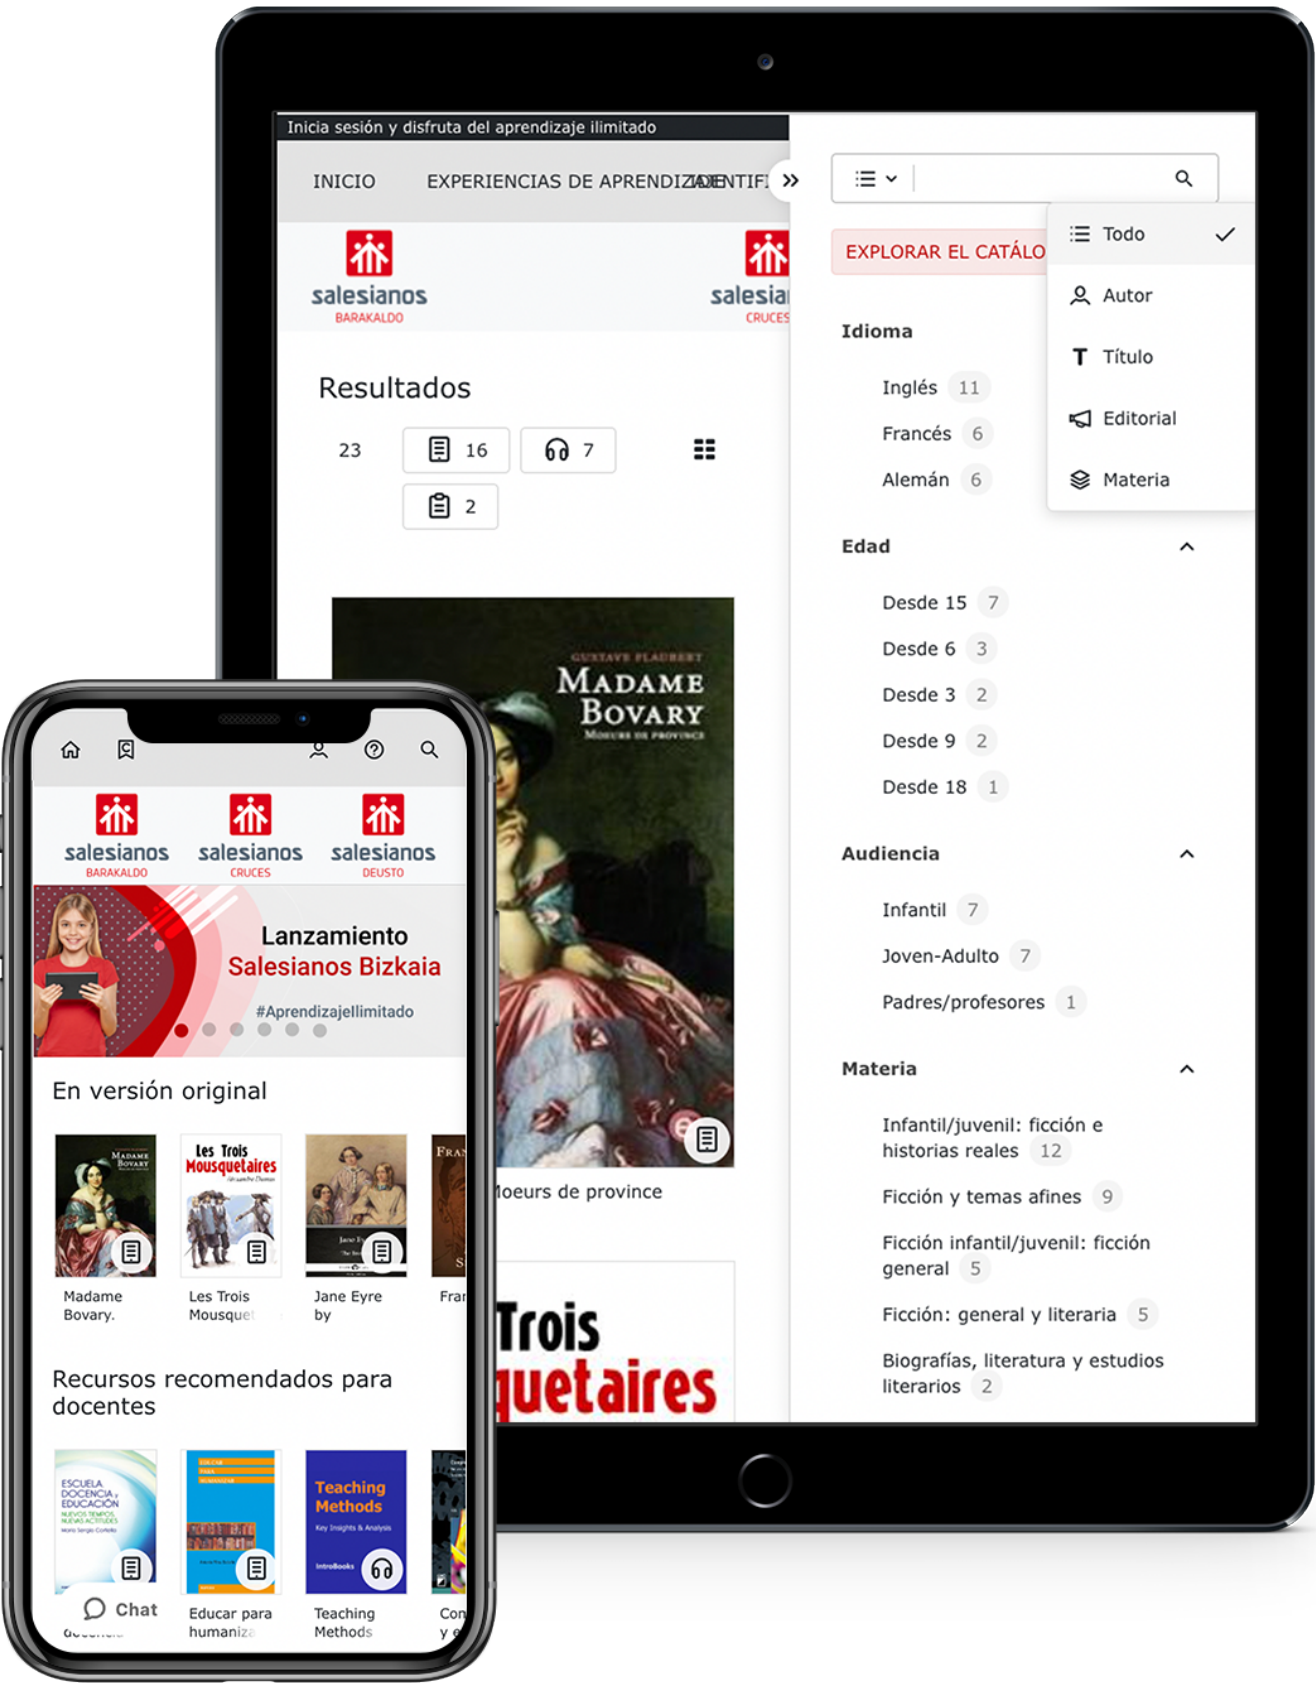

Creation of Learning Experiences to **foster 1:1 learning**

Constant, easy review of the curriculum to **favor active classrooms**

Personalization of the curriculum for each student

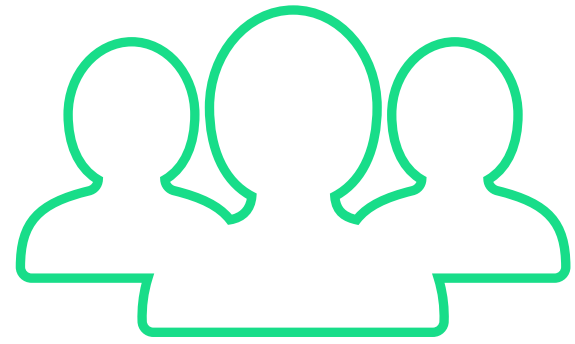

About ODILO

ODILO is the leading SaaS EdTech company in the creation of Unlimited Learning Ecosystems. ODILO integrates the newest technology (Artificial Intelligence, Machine Learning...) with multiformat content from the best providers in the world and intelligent learning services to help every organization deepen and promote a personalized, unlimited learning culture.

With ODILO, schools, governments, organizations, companies, and many others can create their own Unlimited Learning Ecosystems and enjoy learning experiences, education, and reading to prepare students for the future.
